

ENVIRONMENTAL POLICY

The purpose of the environmental policy is to provide the framework and guidelines to all CK Rail employees and stakeholders on how we intend to minimise our environmental impact and continually improve in our effort towards sustainable environmental and energy performance. This environmental policy applies to the entirety of the integrated management system and CK Rail operations.

We (CK Rail) are committed to:

- Achieving environmental best practice throughout our business activities wherever practicable.
- Protecting the environment, preventing pollution and minimising the environmental impact of our operations
- Complying to all relevant legal and regulatory obligations, including the obligations presented by our key customers and stakeholders
- Continually review and improve the environmental elements of the integrated management system
- Providing all necessary resources in order to ensure the effective and efficient implementation of the integrated management system

We aim to deliver our environmental commitments through the implementation of an integrated management system that manages all environmental impacts and is certificated to ISO 14001:2015.

Our environmental objectives are:

- Maintain certification to ISO 14001 and all relevant supplier qualification schemes
- Continually review our environmental impact through the implementation of the environmental impact assessment process.
- Identify and implement all necessary environmental processes and procedures in order to minimise our environmental impact.
- Continually identify opportunities to make a positive contribution to the environment in all activities
- Measure CK Rail Carbon footprint and introduce improvement initiatives by the end of 2022
- Encourage active participation from company staff at all levels in improving environmental performance.
- Minimising noise nuisance, especially on site where the public or residents may be affected (including night work).
- Continually improving our environmental performance.

The principles and objectives detailed above apply to all our (CK Rail) business activities, including work in the rail industry. The integrated management system covers every aspect of CK Rail operations.

We (CK Rail) will comply with our client's environmental requirements, and work closely to ensure our environmental impact is as small as reasonably practicable.

Signed:

Position:

Mr Daniel Hughes
Managing Director
